        Magna Cum Laude, Cumulative GPA : 3.854
        Minor in Game Design
        Awarded May 2017

Professional Experience

Heat.wav - Full Stack Developer

New York, New York (June '17 - Present)
Heat.wav is a web platform taking a locational and spatial approach to helping early-to-mid stage artists discover new opportunities

I work closely with the founder to ensure his creative vision is translated to the technical implementation of the platform. I am responsible for modeling the platform structure, developing key features, integrating external API's and services, and implementing the UI.

Endorsify - Full Stack Developer Intern

New York, New York (May '17 - July '17)
Endorsify is a web platform applying image recognition and machine learning models to the influencer marketing industry

I integrated the Stripe's services into the platform to enable subscriptions to Endorsify and allow users to hire and pay other users. Additionally, I developed a real-time messaging system using Pusher's API.

Core Competencies

C# | Ruby | PHP | Java | Git | SQL | Javascript | HTML | CSS

Unity Engine | Ruby on Rails | Laravel | Java EE | React | Adobe Creative Cloud
